ITA14 – ETHICAL HACKING

EXPERIMENT 2

Execute and display the results for the following commands in Kali Linux Operating System: less command, more command, vi command.

AIM

To execute and display the results for the less, more, and vi commands in Kali Linux Operating System.

PROCEDURE

1. Open Kali Linux and open the terminal.

2. Create a file and insert content using nano:

```
touch EH.txt
nano EH.txt
```

Enter the following content in the file:

```
Unit 1
Introduction to Ethical Hacking
Types of Hackers and Their Roles
Ethics of Ethical Hacking
Ethical Hacking and the Legal System
Proper and Responsible Disclosure
```

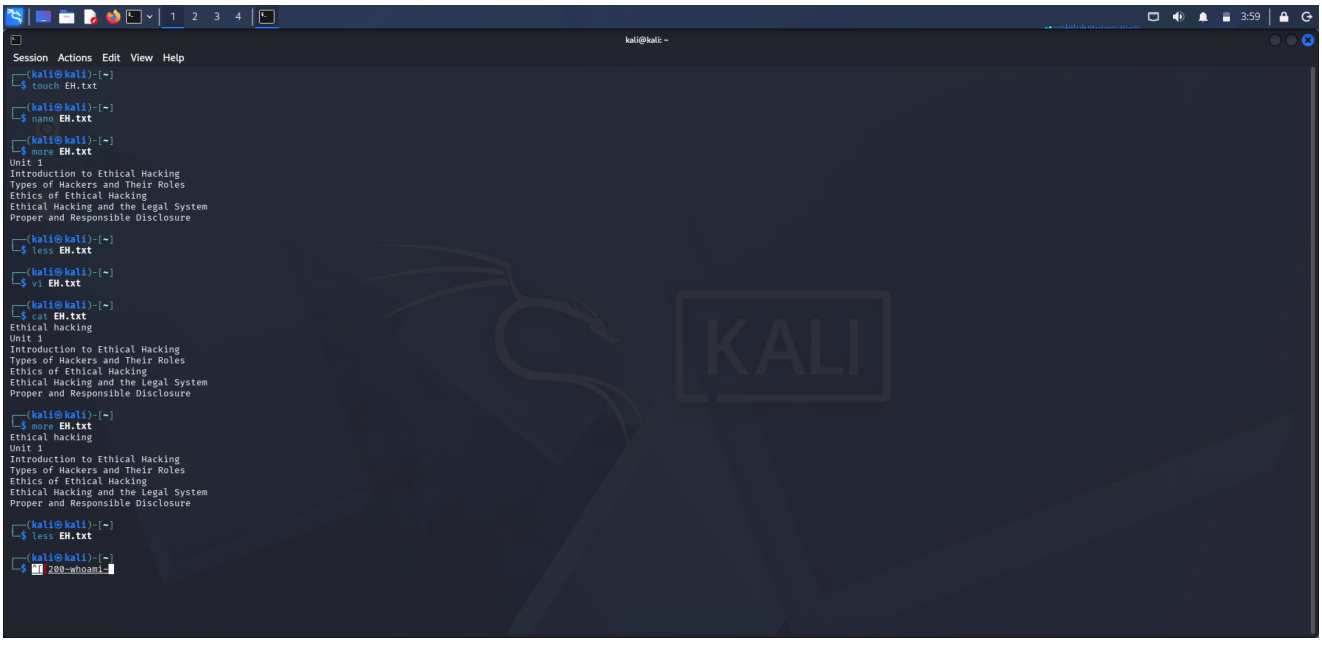

Press Ctrl+O, Enter, then Ctrl+X to save and exit nano.

3. Execute the more command: **more EH.txt**

4. Execute the less command: **less EH.txt**. Press q to quit.

5. Execute **vi EH.txt**, press i to enter insert mode, add “Welcome to Ethical Hacking” on a new line, press Esc, type :wq, and press Enter to save and exit.

OUTPUT – ACTUAL KALI LINUX TERMINAL SCREENSHOT

RESULT

The more and less commands were executed to view the contents of EH.txt, and the vi command was used to edit and save the file.
